

WINDOW SAFETY

Please be advised in efforts to protect our children that ALL windows can be potentially dangerous to residents. When possible, windows should be opened from the top. This is extremely important when the window is a second floor window.

The screens provided on the windows are to keep pests out and not to contain children or pets. Screens are designed in such a fashion that direct pressure could force the screen completely away from the window. The mesh material could also become detached from the frame if children or pets push against them.

Loose or damaged screens should be reported to The Landings at Langley Welcome Centers.
